01 / SERVER SYSTEMS

Compute that fits the workload.

Configurable on-premise server infrastructure for demanding edge, security, enterprise and AI workloads.

CONFIGURABLE PROCESSOR

Intel Xeon / Intel Core i7

Processor selection tailored to deployment needs

D3HW-5212H5

NEURULUS SERVER / CONFIGURABLE PLATFORM

BIS REGISTERED
R-63006084

DESIGNED FOR REAL OPERATING NEEDS

The Neurulus D3HW-5212H5 series is designed for organisations deploying dedicated compute in controlled environments. Select the processor, memory, storage, networking and software stack around the application - from security operations to local analytics and infrastructure services.

CONFIGURATION FRAMEWORK

PROCESSOR	Intel Xeon / Intel Core i7
MEMORY	Scalable RAM to project requirements
STORAGE	SSD / HDD options; capacity to order
NETWORK	Ethernet interfaces per solution design
SOFTWARE	Linux / application stack as specified

PLATFORM & DEPLOYMENT VALUE

01 **Workload-sized compute**
Avoid a one-size-fits-all configuration.

02 **Local infrastructure**
Run services close to users and devices.

03 **Integrated deployment planning**
Align server hardware, OS and workloads.

04 **Operational ownership**
Plan access, maintenance and data location.

SELECTED APPLICATIONS

AI-NVR / VIDEO
Local video processing

CYBERSECURITY
NGFW and SecOps

EDGE COMPUTE
On-site service workloads

STORAGE & IT
SAN / NAS and IT services

BIS / SERVER (ADPM)
IS 13252 (Part 1):2010 / IEC 60950-1:2005
